

CHROME POLISH

Cleaning and protective polish

Description

Chrome polish is a high-shine polish for chrome, stainless steel and aluminium. The product cleans, polishes and protects surfaces. For example, it can be used to clean road tar burnt onto motorbike exhausts. An extremely thin, invisible, gloss protective film that protects against corrosion is left behind on the cleaned surface.

Product features

- highly effective cleaning
- protects against corrosion

Field of application

All chrome-plated parts, e.g. motorbike exhaust and rims, spokes, mudguards for bicycles and car rims. Can also be used for fittings in built-in bathrooms and kitchens.

Application

Shake before use. Put polish on a dry cloth or directly onto the surface, rub in well and re-polish with a soft, lint-free cloth. Do not use on hot surfaces (contains acetone).

Notes

Shake before use. Warning: contains acetone
